

## Case History 548

### *Wastewater Pipeline Rehabilitation and Protection*

Location: Cottage Grove, IL  
Date: 1994

305 linear feet of 36" RCP storm sewer with 3' average overlay. The pipe was in good condition except for some installation damage and minor infiltration at the joints.

Structural damage was repaired with Raven structural epoxy grouts and the remainder of the pipe was coated with 80 mils of Raven 405 to prevent infiltration and protect the concrete from abrasion.
