

Case History 531

Rehabilitation and Protection Concrete Potable Water Storage Tank Duluth Woodland Reservoir

Location: Duluth, MN
Date: September, 2000

Rehabilitation and protection of Woodland Reservoir No. 2, a two million gallon concrete ground reservoir located in Duluth, MN.

Following surface preparation, repairs were made with A-7 grout. An initial coat of 8-10 mils, followed by two additional coats of 15 mils of Raven's AquataPoxy A-6 was applied.

Raven's A-6 coating has provided improved water quality, while extending the life of the tank for many years.
