Concrete Potable Water Storage Tank

Owner: Country of Kauai
Location: Lihue, Kauai
Date: July, 1999
Crew: Certified Applicator

New 1.5 million gallon potable water concrete storage tank. Surface was prepared with high-pressure water cleaning. Bugholes were filled with A-7 grout. An initial coat of 5-8 mils of A-6 was applied, followed by three coats of 12-15 mils.

Total DFT 40-50 mils of A-6 is providing improved water quality, while extending the life of the tank by many years.
